Homework Exercises (End of Chapter Questions)

These will not be collected. These will help you prepare for the discussion quiz on Wednesday, Feb. 7 and the exam Wednesday, Feb. 14. Note that answers to questions with boldface numbers in the text can be found in the appendix. Answers to non-boldface questions will be posted in the lecture section of the class web site

(http://www.uwosh.edu/faculty_staff/gutow/Chem_105_S07/Main.shtml).

(I have left out the digit before the decimal place indicating chapter number.)

Chapter 1: 1-6, **8, 10**, 13-16, **18, 20, 22, 28, 30, 32, 34**, 37d, **44, 46, 56**, 72

Chapter 2: 9,10, **12, 14, 16, 62**

Chapter 3: 1-4, **6**

Chapter 7: 1-4, **8**

Suggestions for getting the most out of doing these exercises:

- 1) Remember that these are the suggested minimum set of problems to try.
- 2) **Do not look at the answers until you have tried all the problems and spent time struggling with the ones you cannot do.**
- 3) Mark any exercises you get wrong. Review the appropriate chapter sections, talk to your classmates and ask the instructor for help. Try sending questions to the e-mail list.
- 4) Redo all exercises you get wrong without the answers in front of you. Repeat with a minimum of 30 minutes between looking at the answers and trying the problem until you can get them right.
- 5) **Do not just look at the answers and say "oh yeah, I understand." You will not be able to reproduce the result on an exam or quiz if you do not do it yourself without looking at the answer.**
- 6) Do extra exercises like those with which you have trouble.
